

The LINIA luminaire system has made popular by its easy and fast installation. Using them, any length light strips can be formed, which not only can aesthetically provide high quality lighting for offices, industrial halls and educational institutions, but – due to their T8 and T5 linear fluorescent lamps and LED tubes – the lighting is energy-saving and environment-friendly, as well.

In its improved version, thanks to the through wiring trunking, the gear tray can be mounted at different distances anywhere, so the required lighting levels can be ensured in optimal way.

In addition to the lower investment costs, also the energy consumption and the installation costs reduced significantly and the subsequently updating of the lighting system can be solved without any problems. The portfolio includes also emergency lighting luminaires, E14/E27 lampholders for compact fluorescent lamps and LEDs, illuminated information boards, sockets, lighting track systems and units for direct mounting of spot lamps.

Due to the five, seven, and eleven-core wiring, also the installation of emergency and dimmable lighting systems becomes extremely simple.

- Connect to any place of the lighting track
- Energy efficient modular system
- Modules for any requirements
- Simple, fast, electrician-friendly installation, which minimize mistakes
- Safety due the earthing through forced contacting
- colour-coded components
