A.A.G. Stucchi is an Italian company and a leader in the lighting components industry with "Made in Italy" production. It was founded in Olginate (Lecco district) in 1944 and the headquarter and production site is still there. As the international business is very strategic the company has commercial subsidiaries in USA, Hong Kong and Shanghai and agents/distributors in more than 80 countries all over the world.

In the more than half a century of its history, the company has developed an important know-how in the **design, production and marketing** of lighting components. From March 2014 A.A.G. Stucchi is part of GRUPPO STUCCHI together with PFA (an aluminum extruder). The group is entirely Italian but has strong international ambitions and from the synergies inside the group itself A.A.G. Stucchi developed its brand new product families: ONETRACK – components for track lighting and smart lighting systems related to it; CRYSTAL – heat sinks and LUMIAL – extrusions for the lighting field.

Moreover in 2016 the company completed its connectors product range by including EPC connectors in it and thus enlarging the application field for this family to the building one.

The company is ISO 9000 (quality) and ISO14001 (environment) certified.
