Headquartered in Innsbruck (Austria), e-term Handels GmbH are producing electrical installation materials (terminal blocks, phase tracks, etc.), ballasts, transformers and switchboard systems. The company can offer international level electrical installation materials – both in standard design or with small changes, as well as new developments according to the customer needs. For this, the company has developed a new operating system, which smoothly connects the products, the employees and the customers, and can quickly and flexibly respond the customer needs and provide the best possible service.
