Nordeon is a new innovative European Lighting company with over 60 years of experience in lighting. It was founded in 2012 with the acquisition of Philips' professional luminaire manufacturing and development site in Springe, Germany, which was later supplemented by the acquisition of Philips' light source manufacturing plants in Chalon and Dijon.

Today, Nordeon Springe is one of Europe's largest manufacturing sites of professional LED based luminaires for retail, industry and outdoor markets.

As a former Philips' lamp manufacturing plant, Nordeon Chalon has broad experience in the manufacturing of standard and specialty linear fluorescent lamps.

The company's services are complemented by the Dijon factory packaging, logistics and customer service activities.
